

# TRANSFER PATIENTS WITHOUT Manual Lifting

- Safer and More Comfortable One-Caregiver Patient Transfer
- Reposition Patients from Bed to Chair Position WITHOUT Manual Lifting
- Home Health and Hospice Approved

## BARTON CHAIR

Patient Transfer System

Fully Accredited Medicare Provider

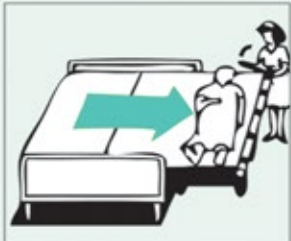

**ONE CAREGIVER**  
Transfer System for Bedbound and Chairbound Patients in Home Health and Hospice Settings

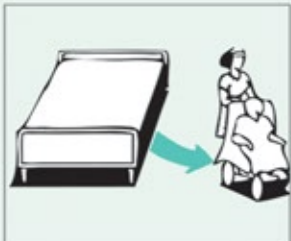

**Step 1**  
Place the chair by the bed in the stretcher position.

**Step 2**  
Attach the bed sheet to the transfer bar.

**Step 3**  
Transfer the patient by turning the handle.

**Step 4**  
Incline the chair to transport patient.

### Patient Requirements

- The Barton Chair multi-positional patient transfer system is covered by Medicare when transfers between bed and a chair, wheelchair, or commode are required, because without the use of a lift, the beneficiary would be bed confined.
- Require supine/lateral transfers
- Non-weight bearing and chairbound patients that require Max-Assist transfers

### Qualifying Patient Diagnoses

- Alzheimer's/Dementia
- Amputations (AKAs and BKAs)
- Multiple Sclerosis (MS)
- Joint Contractures
- Decubitus Ulcers (Stage II or Greater on Trunk or Pelvic Region)
- Degenerative Joint Disease (DJD)
- Osteoarthritis
- Paralysis (Paraplegia and Quadriplegia)
- Rheumatoid Arthritis
- Seizure Disorder
- Stroke

Medicare Covered and Coded E1035 & E1036
